OBJECTIVE

With 6 years of experience spanning research, data analysis, and business operations, I have recently expanded into AI and Automation, where I now design workflows, build AI agents, and deploy voice AI systems that help businesses work smarter. As an AI & Automation Consultant, I automate repetitive processes, integrate AI into client operations, and build systems that save time and cut costs, proven through automation systems I've delivered for clinics, restaurants, gyms, and retail brands. I don't just plan, I execute, with accountability and integrity at the core of everything I deliver.

SKILL(S)

- Workflow Automation (n8n, Make.com, Zapier)
- AI Agent & Voice AI Design & API Integration
- Data Analysis & Research
- Automation Documentation
- Process Optimization
- Client Systems & Retention Automation
- Active Listening & Communication
- Cross-Functional Project Delivery

PROJECT(S)

AI Voice Agent & Ordering Systems Developer

Remote

Aug. 2026

Key Duties and Responsibilities

- Designed and deployed an **AI voice agent** for a restaurant, automating phone orders and reservations, reducing missed calls by **35%** and enabling **24/7 customer engagement**.
- Integrated the AI agent with **Airtable CRM and Slack**, automating order capture, real-time team notifications, and eliminating manual data entry, saving front-of-house staff **8+ hours weekly**.
- Built an automated operations workflow with live order visibility and alerts, reducing communication delays by **25%** and improving reservation handling speed by **85%**, cutting booking time from **5 minutes to under 80 seconds**.

AI Automation & Support Systems Developer

Remote

May 2026

Key Duties and Responsibilities

- Automated repetitive business workflows for client operations, reducing manual effort by **40%** and **saving 10+ hours** per week per client.
- Reported and tracked workflow performance post-automation, **cutting error rates by 30%** and improving overall team efficiency.

- Designed and deployed an AI chatbot prototype that **resolved 70%** of standard customer support queries autonomously, directly contributing to increased product purchases.
- Reduced average **customer reply time from 2 hours to 7 minutes**, improving customer satisfaction and reducing pressure on support staff.

AI-Powered Growth & Content Automation Engineer

MyEzer Services

Remote

June 2026

Key Duties and Responsibilities

- Engineered a fully autonomous content pipeline generating stories, AI visuals and captions, then auto-publishing to LinkedIn on schedule, **eliminating 100% of manual content effort** for the client.
- Integrated Leonardo AI using **n8n** for real-time visual generation, cutting content creation time by **80%** compared to manual design workflows.
- Reduced client's daily content workload from several hours to zero active involvement, freeing business owners to focus on core operations.

Prior Experience

- Financial Data Analyst, **Chillombae's Studios** (Remote, US) — Mar 2020 to Jan 2021
- Content Strategist & Ghostwriter, **Freelance** — Mar 2019 to May 2025

EDUCATION

BSc. In Accounting

Abia State University, Uturu

Sept. 2017 - 2021

CERTIFICATION(S)

- AI & Automation (IS Academy) *Jun. 2026*
- Commonwealth – Generative AI *Apr. 2025*
- Commonwealth – Responsible AI *Apr. 2025*
- Commonwealth – Web 3.0 *Mar. 2025*

HOBBY

Table Tennis | Researching | Listening to Music | Travelling
